AK	<p>Guidelines As To Who May Perform Laser Surgery The Alaska State Medical Board has adopted the policies of the American Medical Association, following, to be its guidelines to its licensees in Alaska with regard to who may perform laser surgery.</p> <p><u>Performance of Laser Surgery</u> American Medical Association's Policy H-475.989, Laser Surgery, reads: "Laser surgery should be performed only by practitioners licensed to practice medicine and surgery or by those categories of practitioners currently licensed by the state to perform surgical activities." American Medical Association's Policy H-475.988, Laser Surgery, reads: "The board opines that revision, destruction, incision or other structural alteration of human tissue using laser is surgery." Adopted January 16, 2004</p> <p>http://www.commerce.state.ak.us/occ/pub/CME_To_Whom_May_Perform.pdf</p>	<p>Guideline For Physicians In Delegating Procedures To Non-Physician Personnel When Performing Certain Dermatological Procedures.</p> <p>"Under the appropriate circumstances, a physician may delegate certain procedures to certified, licensed, non-physician office personnel e.g., nurse, physician assistants, or certified medical assistants). Specifically, the physician must directly supervise the non-physician office personnel to protect the best interest and welfare of each patient. The supervising physician shall be physically present on-site, immediately available, and able to respond promptly to any question or problem that may occur while the procedure is being performed. It is the physician's obligation to insure that, with respect to each procedure performed, the non-physician office personnel possess the proper training in cutaneous medicine, the indications for the procedure, and the pre- and post-operative care involved." Adopted January 16, 2004</p>	
AZ-M	<p>Arizona Admin. Code Article 14</p> <p>R12-1-1440. Medical Lasers</p> <p>Class 3 and Class 4 laser products used in the practice of medicine must have a means for measuring the level of laser radiation within specified range of error and a guard mechanism on the switch to control patient exposure and prevent inadvertent exposure.</p>	<p>A.R.S. R4-16-301 through 303 provides for a Supervising physician to delegate specific Medical procedures to a medical assistant Consistent with the CAAHEP <i>Standards for An Accredited Educational Program for the Medical Assistant.</i></p> <p>R12-1-1438. Hair Removal and Other Cosmetic Procedures Using Laser and Intense Pulsed Light</p>	

Last updated: May 2012

State	Laser Regulation Law, Rule or Policy	Requirements Related to Supervision and/or Delegation of Medical Functions to Unlicensed Individuals	Pending Legislation
	<p>Must calibrate a laser according to the manufacturer's specified calibration procedure, at intervals that do not exceed those specified by the manufacturer.</p> <p>In a medical facility where several medical disciplines or a number of different practitioners use Class 3b and Class 4 lasers, a Laser Safety Committee must be formed to govern laser activity, establish use criteria, and approve operating procedures.</p> <p>For Class 3b and Class 4 lasers, a Physician must also establish a written laser safety training program.</p> <p>R12-1-1438. Hair Removal and Other Cosmetic Procedures Using Laser and Intense Pulsed Light</p> <p>Requires “registration of any medical laser or IPL device that is a Class II surgical device, certified as complying with the labeling standards in 21 CFR 801.109”</p> <p>Registrant must “ensure that the device is only used by a licensed practitioner or an operator who is working under the direct supervision of a licensed practitioner, or at minimum, an operator who is working under the indirect supervision of a licensed practitioner.”</p> <p>“Ensure that a licensed practitioner purchases or orders the Class II surgical device that will be used for hair removal procedures.”</p>	<p>A registrant must “[n]ot permit an individual to use a medical laser or IPL device for hair removal procedures unless the individual completes an approved operator didactic training program of at least 40 hours duration; is directly supervised for at least 24 hours on the job by a licensed practitioner; and performs or assists in at least 10 hair removal procedures. The individual shall obtain this hands-on experience under the direct supervision of a licensed practitioner</p> <p>A registrant must ensure that the operator follows written procedure protocols established by a licensed practitioner; ensure that the operator follows any written order issued by a licensed practitioner, which describes the specific site of hair removal; maintain a record of each hair removal procedure protocol , maintain each procedure protocol onsite, and ensure that the protocol contains instructions for the patient concerning follow-up monitoring; design each protocol to promote the exercise of professional judgement by the operator “commensurate with the individual's education, experience, and training.”; require that a licensed practitioner observe the performance of each operator during actual procedures at intervals that do not exceed six months, maintain a record of the observation, verify that a licensed practitioner is qualified to perform hair removal procedures, and provide radiation safety training</p>	
AZ-O	Nothing on website		
AR	<p>Regulation No. 22. Laser Surgery Guidelines Pursuant to Ark. Code Ann. 17-95-202, the practice of medicine involves the use of surgery for the diagnosing and treatment of human disease, ailment, injury, deformity, or other physical conditions. Surgery is further defined by this Board as any procedure in which human tissue is cut, altered, or otherwise infiltrated by mechanical means, to include the use of lasers. The Board further finds that the use of medical lasers on human beings, for therapeutic or cosmetic lasers, constitutes the practice of medicine. Adopted 6/5/1998; Amended 6/2/2005 http://www.armedicalboard.org/Professionals/pdf/MPA.pdf</p>	<p>Arkansas statutes 17-105 to 111 governs the delegation of health care services to a physician assistant. Physician assistants may perform those duties and responsibilities, including the prescribing, ordering, and administering drugs and medical devices that are delegated by their supervising physician. Supervision shall be continuous, but does not require the physical presence of the supervising physician at the time and place that the services are rendered.</p>	

State	Laser Regulation Law, Rule or Policy	Requirements Related to Supervision and/or Delegation of Medical Functions to Unlicensed Individuals	Pending Legislation
CA-M	<p>The Business and Professions Code includes the use of laser devices in the definition of the practice of medicine. Only physicians, dentists, physician assistants and nurses may use laser devices, including intense pulse light devices, with physician supervision within their legal scope of practice. The law requires written protocols and procedures relating to supervision. Laser hair removal may be performed only by a physician, or, when working with a physician, registered nurse or physician assistants.</p> <p>A 1997 Attorney General opinion states that physicians may not authorize medical assistants to perform laser treatments.</p> <p>Cosmetic procedures http://www.caldocinfo.ca.gov/licensee/medical_spas-business.pdf Hair removal http://www.caldocinfo.ca.gov/allied/medical_assistants_lasers.html</p>	<p>The CA Business and Professions Code Relating medical assistants allows a medical assistant, under the supervision of a licensed physician, to administer medication by intradermal, subcutaneous, or intramuscular injections and to perform skin tests and other technical supportive services upon specific authorization. Authorized procedures must be within the scope of the physicians practice and the physician must be physically present in the treatment facility during the performance of the procedures.</p>	<p>CA SB 100, passed 10/9/2011 requires the Medical Board of California, in conjunction with the Board of Registered Nursing and in consultation with the Physician Assistant Committee and professionals in the field, to review issues and problems relating to the use of laser or intense pulse devices for elective cosmetic procedures by their respective licensees. The bill requires the Board to adopt regulations by January 1, 2013 regarding the appropriate level of physician availability needed within clinics or other settings using certain laser or intense pulse light devices for elective cosmetic surgeries.</p>
CA-O		<p>California Business and Professional Code Section 2459.6 regulates the delegation of a task to an unlicensed person. Physicians may assign only those patient-related tasks that can be safely and effectively performed by an aide. The supervising physician shall be responsible at all times and shall provide continuous and immediate supervision. The physician shall be in the same facility as, and in proximity to the location where the aide is performing the task and shall be readily available at all times.</p>	
CO	<p>It is Board policy that the use of lasers for patient care constitutes the practice of medicine. The Board adopted a policy statement in November 1997 that lasers must be used by a Colorado licensed physician or under the direct and on-site supervision of a Colorado licensed physician. The Board expressed its intent that this be an employer/employee relationship such that the physician has direct control of the unlicensed person.</p> <p>Medical Devices and Esthetic Practices http://www.dora.state.co.us/barbers_cosmetologists/news/Me</p>	<p>In November 2002, the Board held a hearing on proposed rules regarding the delegation of medical functions to unlicensed persons.</p>

	<p>must maintain on-site supervision while treatment is being performed. The MPA creates an exemption from medical licensure only with regard to the use of Class I or II, nonprescriptive medical devices.</p>	<p>Supervising and Directing Physicians, Fee Rule Nancy Kerr, Executive Director, Idaho Board of Medicine, stated the pending rules are the result requests by licensees, nurses, and business interests for the board to review/revise its current policy related to laser procedures. The majority supported the amendment to the rules. The pending rule (1) creates a framework for the training and supervision of personnel providing laser treatment or services to patients in Idaho and (2) provides for accountability of the physician responsible for the laser device or prescriptive cosmetic treatment to train personnel and supervise services and to provide alternate supervision to medical personnel when not available, as well as (3) provides for responsible and reasonable limits on the number of personnel supervised to ensure adequate supervision with a provision for a wavier to consider unusual circumstances, and finally (4) a general housekeeping effort, corrections and clarification in terminology are added. Motion Senator Werk moved to approve docket 22-0104-0601. The motion was seconded by Senator Hammond. The motion carried by voice vote. http://legislature.idaho.gov/sessioninfo/2007/standingcommittees/shelmin.pdf#xml=http://legislature.search.idaho.gov/isysquery/bc265755-7944-443c-a245-5c384e2dd148/2/hilite/</p>	
IL	<p>4) Statutory Authority: Medical Practice Act of 1987 [225 ILCS 60] 5) A Complete Description of the Subjects and Issues Involved: Lasers are frequently used in "medical spas" to remove hair, birthmarks or previously applied tattoos. The misuse of laser equipment by inadequately educated or trained individuals without adequate physician supervision can result in permanent scarring, long-term pain or even misdiagnosed cancers. This proposed amendment clarifies existing law and the longstanding position of the Department and the Medical Disciplinary Board that laser equipment, which affects living layers of skin, is a medical device and must only be used with direct supervision by a physician. While the physician may delegate performance of laser procedures to appropriately educated, trained, and experienced nurses or other personnel, the physician must provide proper supervision, including initial</p>	<p>The MPA, Section 54.5, provides authority for physicians to delegate tasks or duties to licensed practical nurses, registered nurses, or other personnel.</p>

IN	<p>State statute defines the use of lasers as surgery and, therefore, such use constitutes the practice of medicine. MPA, Article 4, Section 844 IAC 4-3-2 Surgical Operations http://www.in.gov/pla/files/Microsoft_Word_-_Medical_Licensing_Board.2010.pdf</p>	<p>The MPA, IC 25-22.5-1-2 allows a physician to delegate a medical task that is within the physician's specific area of practice to an employee who is under the direction and supervision of the physician.</p>	
IA	<p>The Board established an Ad Hoc Committee on the Use of Lasers, Intense Pulsed Light Devices, and Radio-Frequency Devices. The Committee issued a report that was accepted in April 2006.</p> <p>Summary: The Committee concluded that the regulation of lasers and associated devices is a very complex issue, involving a broad range of changing technologies and significant scope of practice implications. However, unregulated widespread use of these devices is an increasing public safety concern. Concerns regarding safety risks for these devices vary significantly. In addition to safety risks, there are concerns regarding the efficacy of the services offered, including fraudulent practices. Choosing a qualified healthcare provider to provide medical treatment with lasers or associated devices is an important decision. The public should consider all of the issues discussed above before choosing a provider.</p> <p>Report from the Ad Hoc Committee on the Use of Lasers, Intense Pulsed Light Devices, and Radio-Frequency Devices http://medicalboard.iowa.gov/policies/lasers.html</p>		
KS	<p>In April 2001 and amended in March 2002, the Board adopted regulations relating to supervision of light-based medical treatments. The regulations require physicians to have written practice protocol agreements with those who use a light-based medical device to provide a professional service under their supervision. Treatments are required to be performed at a location where the supervising physician maintains a practice or while the physician is physically immediately available.</p>	<p>KSA 65-2872(g) establishes that persons performing medical services under the supervision of a physician are not unlawfully practicing medicine.</p> <p>KSA 65-28, 127 places specific duties on physicians who delegate, etc., acts that constitute the practice of medicine under the MPA.</p>

	<p>for any disease or human ailment. “Surgery” means any procedure, including but not limited to laser, in which human tissue is cut, shaped, burned, vaporized, or otherwise structurally altered, except that this section shall not apply to any person to whom authority is given by any other statute to perform acts which might otherwise be deemed the practice of medicine. “Laser” means light amplification by stimulated emission of radiation.</p> <p>Only physicians and physician assistants who are licensed by the Board are allowed to perform laser procedures.</p>		
NJ	<p>SUBCHAPTER 4A. SURGERY, SPECIAL PROCEDURES, AND ANESTHESIA SERVICES PERFORMED IN AN OFFICE SETTING</p> <p>“Surgery” means a manual or operative procedure, including the use of lasers, performed upon the body for the purpose of preserving health, diagnosing or treating disease, repairing injury, correcting deformity or defects, prolonging life or relieving suffering. Surgery includes, but is not limited to: incision or curettage of tissue or an organ; suture or other repair of tissue or an organ; a closed or open reduction of a fracture or extraction of tissue from the uterus.</p> <p>13:35-4A.12 Alternative privileging procedure (d) A practitioner who seeks to utilize laser surgery techniques in an office, but does not hold privileges at a licensed hospital to do so, shall submit to the Board an application, which shall include:</p> <ol style="list-style-type: none"> 1. Certification of successful completion of an accredited laser training program, in which the curriculum includes instruction in laser care, physics and clinical indications for utilization of the specific laser; or 2. Documentation from the program director of an accredited residency training program which the applicant has successfully completed, attesting to the inclusion of training in the specific laser therapy for which privileges are being sought during residency training. <p>13:35-4A.3 Minor Surgery http://www.njconsumeraffairs.gov/laws/BME_Regs.pdf</p>		

State	Laser Regulation Law, Rule or Policy	Requirements Related to Supervision and/or Delegation of Medical Functions to Unlicensed Individuals	Pending Legislation
	<p>Additional examples of minor surgery include closed reduction of a fracture, the incision and drainage of abscesses, certain simple ophthalmologic surgical procedures, such as treatment of chalazions and non-invasive ophthalmologic laser procedures performed with topical anesthesia, limited endoscopies such as flexible sigmoidoscopies, anoscopies, proctoscopies, arthrocenteses, thoracenteses and paracenteses. Minor surgery shall not include any procedure identified as “major surgery” within the meaning of N.J.A.C. 13:35-4.1.</p> <p>“Monitoring” means continuous visual observation</p> <p>13:35-9,11 Referral; informed consent A certified acupuncturist may perform initial acupuncture treatment only on presentation by the patient of a referral by or diagnosis from a licensed physician. The referring or diagnosing physician shall provide to the treating acupuncturist a diagnosis and pre-evaluation of the patient above, use any of the following methods to effect the stimulation of acupuncture points and channels as part of his or her professional practice: 7. Cold laser used for needle-less acupuncture;</p> <p>SUBCHAPTER 12. ELECTROLOGISTS</p> <p>“Electrology” means the removal of hair permanently through the utilization of solid probe electrode-type epilation, including thermolysis, being of a short wave, high frequency type, and including electrolysis, being of a galvanic type, or a combination of both, which is accomplished by a superimposed or sequential blend. This definition specifically excludes laser and other intense light source hair removal from the definition of electrology.</p>		
NM-M	<p>In 2000, the Board revised rules and regulations on the use of lasers and light activated devices to incorporate board policy. The rule states that non-physician personnel performing hair removal on patients must have appropriate training in laser usage and the supervising physician must be on the immediate premises during the procedure. However, when the procedure is performed by a trained physician assistant, the supervising physician is not required to be physically present in the building where the surgery is being performed.</p>	<p>The MPA, Section 61-6-16(6)(3) states that the Act does not limit or prevent a physician from delegating any task or function to a qualified person otherwise permitted by state law or established by custom, except the dispensing of dangerous drugs.</p> <p><i>LASERS & LIGHT ACTIVATED DEVICES FOR HAIR REMOVAL</i> New Mexico allows a non-physician to perform laser or light activated hair removal. However, these services to be performed</p>

State	Laser Regulation Law, Rule or Policy	Requirements Related to Supervision and/or Delegation of Medical Functions to Unlicensed Individuals	Pending Legislation
	<p>In April 2002, the Board adopted a rule stating requirements that must be met before unlicensed personnel may perform hair removal using lasers and light activated devices, including that the supervising physician must be on the immediate premises at all times during a procedure</p> <p>16.10.13.7 DEFINITIONS:</p> <p>C. “Medical therapeutic or cosmetic medical procedure, device, or treatment” means a treatment or procedure that uses any of the following, if the procedure or treatment alters or damages or is capable of altering or damaging living tissue, to improve the patient’s appearance or to achieve an enhanced aesthetic result:</p> <p>(1) injection or insertion of a biologic or synthetic substance for soft tissue augmentation;</p> <p>(2) application of a chemical substance;</p> <p>(3) application of microwave energy; or</p> <p>(4) application of a federal food and drug administration approved prescription device that uses waveform energy of any kind, including, but not limited to lasers or intense pulsed light.</p> <p>D. “Certified” means the medical assistant has been awarded a certificate</p> <p>.</p> <p>http://www.nmmb.state.nm.us/pdffiles/Rules/NMAC16.10.13_MedAsstCosmetic.pdf</p> <p>16.10.13.8 USE OF MEDICAL THERAPEUTIC AND COSMETIC DEVICES. Medical therapeutic or cosmetic devices penetrate and alter human tissue and can result in complications such as visual impairment, blindness, inflammation, burns, scarring, hypo-pigmentation and hyper-pigmentation. The use of medical therapeutic and cosmetic devices is the practice of medicine as defined in Section 61-6-1 NMSA 1978.</p> <p>A. Limitations.</p> <p>(1) Medical assistants are limited to using medical therapeutic and cosmetic devices that are non-incisive and non-ablative. 16.10.13 NMAC 1 16.10.13 NMAC 2</p> <p>(2) Medical therapeutic and cosmetic devices may only be used by a medical assistant who is certified pursuant to Subsection D of 16.10.13.7 NMAC and when the supervising physician is</p>	<p>under the supervision of a licensed physician. The rules require:</p> <ul style="list-style-type: none"> * the supervising physician must have interviewed the patient and recorded appropriate history and physical information; *the unlicensed person who will be performing the hair removal must have been trained on the procedure; *the supervising physician must be on the immediate premises at all times during the procedure; * the unlicensed person performing the service must be fully insured under the physician's medical malpractice pol'cy; * the patient must be informed that the person providing the service is not a physician; and * the Board must have a record of non-licensed staff who are performing these services. 	

State	Laser Regulation Law, Rule or Policy	Requirements Related to Supervision and/or Delegation of Medical Functions to Unlicensed Individuals	Pending Legislation
	<p>immediately available on the premises.</p> <p>B. Responsibility of the supervising physician. A physician who is trained in the safety and use of medical therapeutic or cosmetic devices may supervise medical assistants who perform hair removal and other therapeutic or cosmetic procedures using devices that use waveform energy consistent with the following requirements.</p> <p>(1) The supervising physician must provide the following services before treatment by a medical assistant is initiated: patient history, physical examination, diagnosis, treatment protocol, and preparation of medical record.</p> <p>(2) The supervising physician shall review any adverse outcomes or changes in the treatment protocol.</p> <p>(3) The supervising physician shall assure the patient is informed and aware that the individual performing the procedure is a medical assistant and is under the physician's supervision.</p> <p>(4) The supervising physician shall provide the patient instructions for emergency and follow-up care.</p> <p>(5) The supervising physician shall prepare a written protocol for the medical assistant to follow when using the medical therapeutic or cosmetic device. The protocol may include pre and post care treatment related to the procedure as long as the treatment is topical and non-injectable. The physician is responsible for ensuring that the medical assistant uses the medical therapeutic or cosmetic device only in accordance with the written protocol and does not exercise independent medical judgment when using the device.</p> <p>(6) The supervising physician shall assure compliance with the training and reporting requirements of this rule.</p> <p>(7) The supervising physician is ultimately responsible for the safety of the patient, regardless of who performs the treatment using the medical therapeutic or cosmetic device or procedure.</p> <p>C. Training requirements. Medical assistants who use medical therapeutic or cosmetic devices must have training and be certified on each device they will use. The training on each device must include the following:</p> <p>(1) physics and safety of the medical therapeutic or cosmetic device;</p> <p>(2) basic principle of the planned procedure;</p> <p>(3) clinical application of the medical therapeutic or cosmetic device, including wavelengths to be used;</p>		

State	Laser Regulation Law, Rule or Policy	Requirements Related to Supervision and/or Delegation of Medical Functions to Unlicensed Individuals	Pending Legislation
	<p>(4) indications and contraindications for the use of the medical therapeutic or cosmetic device;</p> <p>(5) pre-operative and post-operative care;</p> <p>(6) recognition and acute management of complications that may result from the procedure; and</p> <p>(7) infectious disease control procedures required for each procedure.</p> <p>D. Reporting requirements. The supervising physician shall complete a "certificate of training" form and submit it to the board prior to the use of a medical therapeutic or cosmetic device by the medical assistant. The form will be device-specific and document training for each medical therapeutic or cosmetic device used by the medical assistant.</p> <p>E. Public communication. Any public communication offering the performance or administration of a cosmetic medical procedure or treatment shall identify the physician or surgeon responsible for the provision of, or the direct supervision of the procedure or treatment.</p> <p>[16.10.13.8 NMAC – Rp 16 NMAC 10.13.8, 4/18/02; A, 12/30/05; A, 7/22/08]</p>

State	Laser Regulation Law, Rule or Policy	Requirements Related to Supervision and/or Delegation of Medical Functions to Unlicensed Individuals	Pending Legislation
	<p>In October 1999, the Board adopted a policy statement defining the use of laser devices as surgery and stating that laser surgery should be performed only by individuals licensed to practice medicine. Use of a laser device for hair removal may be performed by a licensed physician or may be a delegated medical act. If delegated, the person performing the procedure must be under the direct supervision of a physician who must be on-site when the procedure is performed.</p> <p>http://llronline.com/POL/Medical/index.asp?file=Policies/LasersOtherDevices.htm</p>	<p>PURPOSE: The purpose of this policy is to establish a guideline for laser training and continuing laser education of Nurse Practitioners (NP) and Physician Assistants (PA). POLICY:</p> <ol style="list-style-type: none"> 1. The NP/PA laser training protocol will be as follows: <ol style="list-style-type: none"> a. The NP/PA will complete an initial laser specific orientation for each individual laser. This training is conducted by each of the specific laser manufacturers. A certificate will be acquired after completion and will be maintained in each personnel file. b. Under direct supervision of the laser trained collaborating/supervising physician, the NP/PA will be required to perform 40 laser procedures specific to each individual laser which include the Candela V-Beam Pulse Dye Laser, Candela Gentlelase Plus hair removal laser, Candela Smoothbeam Diode Laser, and Cynosure V-Star Pulse-dye Laser. A confidential list of patients treated will be maintained by the NP/PA. This list will be readily available upon request. c. The NP/PA will be required to attend and an American Academy of Dermatology approved continuing education program that specifically addresses laser technology. The NP/PA will complete an initial continuing education program within the first year and will be required to maintain 15 continuing education hours per 2 year period of time. Proof of education will be maintained in the personnel record. d. No healthcare provider, other than physicians, NPs, or PAs, may be trained to use lasers. 2. The collaborating/supervising physician will monitor and evaluate the progress of the NP/PA and if additional education or supervised training is necessary, the physician will amend this training protocol to require additional training. <p>Laser Utilization Protocol</p> <p>PURPOSE: The purpose of this policy is to outline the utilization restrictions and procedure for delivery of laser therapy by NPs and PAs.</p> <p>POLICY:</p> <ol style="list-style-type: none"> 1. The NP/PA laser utilization protocol will be as follows: <ol style="list-style-type: none"> a. Laser therapy will be administered by the NP/PA only after
