MULTIFUNCTIONAL SKIN CARE PLATFORM

2027 MD Glow Hydrofacial

A 9-in-1 skincare platform designed to address fine lines, wrinkles, enlarged pores, uneven tone, and congested skin. Nine specialized handpieces run from one 8.4-inch screen on a single mobile cart.

9
HANDPIECES

11
HYDRO TIPS INCLUDED

3 MHz
BIPOLAR RF

0 / 45 °C
COLD & WARM MODES

Treats all skincare needs

- Fine lines + wrinkles
- Elasticity + firmness
- Even tone + vibrancy
- Skin texture
- Brown spots
- Oily + congested skin
- Enlarged pores

DEEP CLEANING
Cleanse
Hydro dermabrasion, oxygen foam, ultrasonic vibration

MOISTURIZING
Infuse & hydrate
Ultrasound import, polymer atomizing spray

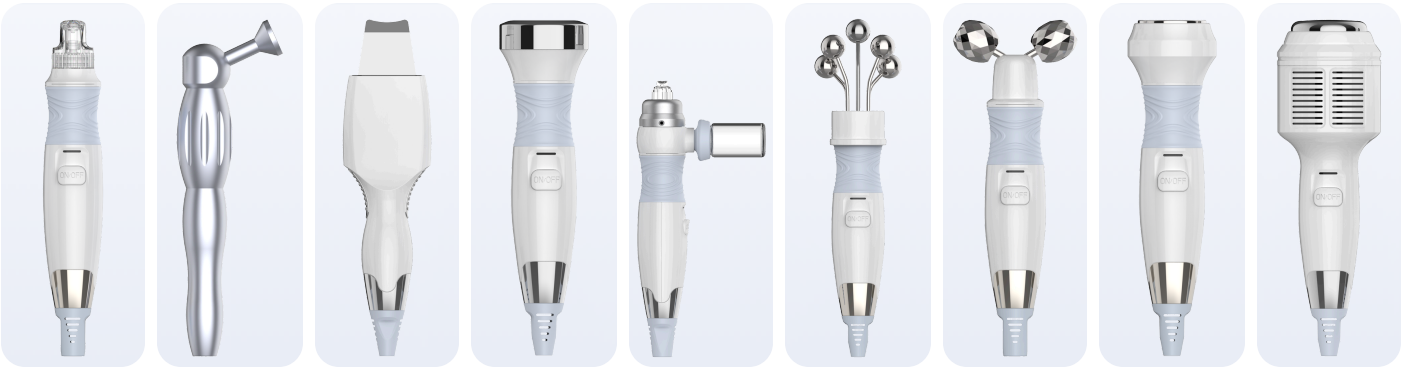

TIGHTENING & LIFTING
Tone & finish
Microcurrent, bipolar RF, cold & warm hammer

MD Lasers · 7696 183A Toll Rd, Unit 1C, Leander, TX 78641 888-446-5727 · 512-215-8553 · info@mdlasers.com · mdlasers.com

THE SYSTEM

Nine different handles, one platform

Every handpiece docks on the cart and connects to the same control unit, so a facial can move from cleansing to infusion to finishing without changing machines.

Hydro dermabrasion — CLEANSE
Mousse bubbles — CLEANSE
Ultrasonic vibration — CLEANSE
Ultrasound import — INFUSE
Polymer atomizing spray — HYDRATE
Multi-pole microcurrent — TONE
Bipolar microcurrent — TONE
Bipolar RF — TIGHTEN
Cold & warm hammer — FINISH

Key benefits

- **Deep cleaning.** Remove blackheads, excess oil, and impurities with hydro dermabrasion for a fresh, clear complexion.
- **Skin rejuvenation.** Enhance elasticity and firmness. Radiofrequency treatment stimulates collagen production for natural skin tightening.
- **Hydration & moisturizing.** Ultrasonic vibration and polymer atomizing spray infuse moisture for long-lasting hydration.
- **Exfoliation & texture.** High-frequency vibration removes dead skin cells, leaving skin smoother and more radiant.
- **Anti-aging effects.** Microcurrent technology supports collagen development to help minimize the appearance of wrinkles and fine lines.

DEEP CLEANING

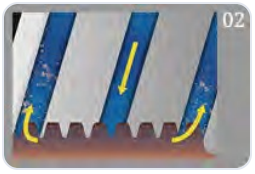

Hydro dermabrasion

Opens the pores, softens the stratum corneum, deeply cleanses and hydrates the skin, removes blackheads, brightens dull skin, and leaves the complexion clear, radiant, and supple.

01 Spray
Solution is sprayed through the inlet of the nozzle tip. It rotates clockwise.

02 Extract
Waste and remaining solution are suctioned into the container through the inlets.

03 Supply
Solution is supplied to the skin surface through the nozzle tip.

In treatment
Water-and-vacuum cleansing at the skin surface.

Eleven dermabrasion tips included

Four tip styles ship with the system (11 pieces total) so you can match the head to the area and the goal of the pass.

Hard turbine
Hydro cleaning head

Microdermabrasion
Exfoliating head

Soft silicone
Hydro cleaning head

Pipe cleaning
Line-cleaning head

DEEP CLEANING

Oxygen foam and ultrasonic exfoliation

Mousse bubbles handle

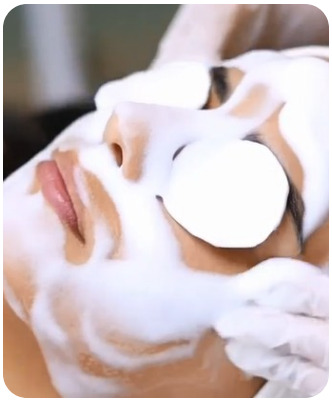

The handle produces dense foam containing a large amount of active oxygen components. Using the high oxidative properties of active oxygen, the hydroxide ions can quickly penetrate into the skin, so as to achieve the effect of cleaning, moisturizing, and rejuvenating the skin.

Ultrasonic vibration handle

Removes dead skin by high-frequency vibration waves, helps remove blackheads, softens skin keratinocytes, and deeply cleanses skin dirt.

Deep cleaning
Remove blackheads, mites, grease, and dust, and remove dead skin.

Skin rejuvenation
Skin moisturizing, shrink pores, essence import, skin brightening, and acne treatment.

Skin tightening
Face lifting, eye lifting, and wrinkle removal.

MOISTURIZING

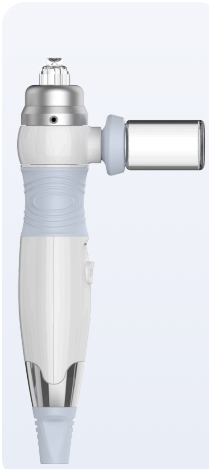

Infusion and atomizing hydration

Ultrasound import

At a frequency of 1 million to 3 million vibrations per second, this handpiece quickly opens the pores, allowing essence to penetrate into the basal layer of the skin.

Polymer atomizing spray

Combined with liquid products, the liquid is converted into mist-like small molecules by high-pressure atomization, then quickly delivered into the dermis by high-pressure spraying for a deep hydrating effect.

TIGHTENING & LIFTING

Microcurrent and bipolar RF

Microcurrent handles

Two microcurrent handles are included: a multi-pole handle and a bipolar roller handle. Microcurrent uses low-voltage electricity to stimulate muscle, adenosine triphosphate (ATP) cell growth, and collagen development in the dermis on the face.

Bipolar RF handle

RF treatment is a non-invasive way to achieve skin tightening and a younger appearance. The RF energy heats the deep skin layers (dermis) to produce collagen. Frequency: 3 MHz.

Lifting and tightening along the contours of the face

FINISH

Cold & warm hammer

0 °C
COLD HAMMER

45 °C
WARM HAMMER

Cold hammer, 0 °C: cools the skin, shrinks pores, and calms the skin.

Warm hammer, 45 °C: increases the temperature of the skin surface, accelerates blood circulation, and increases the absorption rate when used with products.

Scope of treatment

Deep cleaning
- Remove blackheads
- Clear mites
- Remove grease and dust
- Remove dead skin

Skin rejuvenation
- Skin moisturizing
- Shrink pores
- Essence import
- Skin brightening and acne treatment

Skin tightening
- Face lifting
- Eye lifting
- Wrinkle removal

Congestion

Individual results vary.

TECHNICAL DATA

Specifications

System	9-in-1 hydrofacial skincare platform, mobile cart
Handpieces	9: hydro dermabrasion, mousse bubbles, ultrasonic vibration, ultrasound import, polymer atomizing spray, multi-pole microcurrent, bipolar microcurrent, bipolar RF, cold & warm hammer
Dermabrasion tips	11 pieces (hard turbine, microdermabrasion, soft silicone, and pipe-cleaning heads)
Rated power	600 W
RF frequency	3 MHz, bipolar
Ultrasound frequency	1–3 MHz
Hammer temperatures	Cold 0 °C · Warm 45 °C
Vacuum	0–90 kPa
Flow capacity	30 L max
Display	8.4-inch screen
Input voltage	100–240 V, 50/60 Hz
